

EU Penta and Octa BDE Compliance Declaration

The parts which Allegro MicroSystems, LLC sell comply with the requirements of EU Directive 76/769/EC relating to the restrictions on the marketing and use of certain dangerous substances and preparations. The Allegro MicroSystems, Inc. parts also comply with EU Directive 2003/11/EC, an amendment to EU Directive 76/769/EC, which specifies restrictions on the sale of products containing pentabromodiphenyl ether and Octabromodiphenyl ether.

Allegro MicroSystems, LLC, is pleased to provide our customers with information regarding the materials used in the manufacturing of our semiconductor products. We value our relationship and appreciate the need for environmental controls. Allegro considers itself to be an environmentally responsible company.

We believe that we are in compliance with all applicable local, state, federal, and international environmental regulations. To the best of our knowledge, applicable hazardous substances are not present, in excess of specified threshold limits, in the parts that Allegro sells. To assure compliance, we require that our material suppliers provide test reports from independent laboratories, which are typically updated on an annual basis. Such laboratories providing independent testing include SGS, ALS, NML and MRA.

Allegro takes environmental control seriously and we want to assure our customers that we are doing everything reasonably possible to maintain compliance with all environmental standards. However, because we are not the producer of any of the materials contained in our product, notwithstanding anything to the contrary contained in any document, Allegro shall not be liable, under any theory of law, and shall not be responsible to defend or indemnify any party should any material be out of compliance. We believe the controls we have in place will help to assure that Allegro remains compliant. We remain willing to answer any questions you may have regarding our environmental controls.
